Leslie Burke

Dear County Council members and Reeve,

Re: Requesting delay of connection to Kuusamo Krest Wastewater line

Public office and service is a challenging roll in regular times and I can only imagine how difficult this COVID year has been for you as a council. Thank you for the commitment to the County and public safety.

I am writing to request that you approve a deferral of my septic connection requirement to the Kuusamo Krest wastewater line. It's been a staggeringly difficult year on so many levels and this simply would be an additional unnecessary expenditure that we would truly appreciate deferring for a couple of years. We have our own septic tank which is pumped as out as required so there are no environmental differences to deferring making the connection.

Please let me know if this deferral is possible.

Thank for your time and consideration,

A handwritten signature in cursive script that reads "Leslie Burke".
